

AUGUST 2020 FEATURE RELEASE FOR WESHARE

WeShare Features Update

WeShare is excited to announce reporting and ticket improvements, and some customer requests.

Transaction Activity Log UI & CSV Reporting

- Date column includes the timestamp.
- Name divided into 2 columns: First Name and Last Name.
- Email Address column added.
- Payment Type column will display more detailed information for Credit Card records: (V/MC/D or AMEX)

Forms & Tickets

- Numeric value retained in the Quantity field for a ticket unless the user deletes the default value "Unlimited" from that field.

Edit Collection Form Responses Help Text

- When help text is not created for a collection, the page will not render the help text HTML element.
- If there is help text, the help text element will be rendered as text and not a read-only input element.

Customer Request Update

Dashboard

- Minimized left menu display, the Users and Giving Management option display cleaned up.

Semi-annual option on Edit Scheduled Recurring transaction page

- When the user selects invalid dates in the Start Recurrence and End Recurrence date fields for semi-annual frequency, the dates now auto update to valid dates.
